# MATERIAL SAFETY DATA SHEET

Page 1 of 4

Product Name: ABSORBACIDE

Not classified as a hazardous substance according to criteria of NOHSC

# 1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND **COMPANY**

Product name ABSORBACIDE

Other names Diatomaceous earth, Amorphous silica

Product use Used as insecticide dust for the control of insect pests..

**Company Name** Mount Sylvia Diatomite Pty Ltd.

Suite 401/309 Pitt Street, Sydney NSW 2000 Australia Address

Emergency Tel. +61 2 9052 8688 Telephone/fax +61 2 9052 8688

# 2. HAZARDS IDENTIFICATION

Not classified as hazardous according to the criteria of NOHSC. Must be stored

under dry, well-ventilated conditions.

Not classified as dangerous goods according to the ADG code..

#### 3. COMPOSITION/INFORMATION ON INGREDIENTS

Composition. Diatomaceous earth, which is a natural product, derived from the remains of

Information on freshwater plankton. The product contains no detectable cristoballite. It may

contain up to 3% quartz.

ingredients

Chemical Powder

Ingredients Name **Proportion** 

> Diatomaceous earth 96% 61790-53-2 Silica as quartz 14808-60-7 <3%

Other information Mineralogy

Amorphous silica as diatom microfossils generally 96%.

#### 4. FIRST AID MEASURES

Inhalation Move the victim to fresh air. Drink a glass of water to clear throat and blow

nose to evacuate dust. If irritation persists see a doctor.

Wash out mouth with water. If irritation persists seek medical advice. Ingestion Skin

Wash gently with water and non-abrasive soap. If irritation develops and

persists, seek medical attention.

Eve If contact with eye(s) occurs, wash with water while holding lid open. If

irritation persists, seek medical attention.

First aid facilities Eye wash and normal washroom facilities.

Advice to doctor Treat symptomatically. The hazard from the product is the same as from any

> fine, inert dust. The product absorbs moisture and may cause dryness in contact with mucous membranes. Pre-existing upper respiratory and lung conditions such as bronchitis, emphysema or asthma may be aggravated by exposure to the

dust.

# 5. FIRE FIGHTING MEASURES

Flammability The material is not flammable.

Means of extinction Use appropriate fire extinguisher for surrounding environment.

# MATERIAL SAFETY DATA SHEET

Page 2 of 4

Product Name: ABSORBACIDE

Not classified as a hazardous substance according to criteria of NOHSC

Special fire fighting procedures Unusual fire and explosion hazards.

Use NIOH approved self-contained breathing apparatus and full protective clothing to minimise skin exposure.

#### 6. ACCIDENTAL RELEASE MEASURES

Increase ventilation. Wear sufficient respiratory protection and protective clothing and sweep up material avoiding dust generation or dampen spilled material with water to avoid airborne dust, then transfer material to a suitable container. Use absorbent paper dampened with water to pick up remaining material. Prevent the release from entering a waterway or sewer. Dispose of any contaminated material at an approved facility such as a municipal landfill.

# 7. HANDLING AND STORAGE

This material is stable and should be stored in a well-ventilated, dry, cool environment.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

The following National Occupational Health and Safety Commission (NOHSC) **Exposure limits** 

Exposure limits apply:

**SUBSTANCE** TWA  $mg/m^3$ ppm 0.2 Silica: quartz Silica: amorphous (diatomaceous earth) 10 Dust, not otherwise specified 10

Other exposure TWA – The Time-Weighted Average airborne concentration over an eight hour Information

working day, for a five-day working week over an entire working life.

According to current knowledge these concentrations should neither impair the health of, nor cause undue discomfort to nearly all workers. These Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept as low as possible. Exposure standards should not be used as a fine dividing line between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

**Respiratory Protection** Where sufficient ventilation is not available avoid breathing dusts by wearing an

> AS 1716 approved particulate filter respirator. For the most appropriate respirator device, reference should be made to AS/NZS 1715/1716 standards

publication, which deals with respiratory protective devices.

Eye protection The use of chemical goggles or safety glasses with side shield protection is

recommended.

Hand protection The use of nitrile gloves is recommended.

**Eng. Controls** Natural ventilation should be sufficient, however a mechanical exhaust system is

recommended if the product is being handled in a poorly ventilated area.

Other information Biological Limit Values: No biological limit allocated.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

White to light grey dust. **Appearance** 

No odour Odour

**Melting point** 1500 degrees C (aprox).

**Boiling point** Not applicable **Solubility in water** Insoluble

# 10. STABILITY AND REACTIVITY

**Stability** Stable under normal conditions of use.

Hazardous Will not occur.

Polymerisation

**Incompatibility** None

# 11. TOXICOLOGICAL INFORMATION

**Toxicology information** No toxicology information is available for this product. However for crystalline

silica the following data has been extracted from the Register of Toxic Effects of

Chemical Substances:

**TOXICITY** 

Inhalation (human) LCLo: 0.3/m³/10Y Inhalation (human) TCLo: 16mppcf/8H/17.9Y

-Intermittent; focal fibrosis, (pneumoconiosis), cough, dyspnoea.

Inhalation (rat) TCLo: 50mg/m<sup>3</sup>/6H/71W

-Intermittent; liver – tumours.

WARNING: For inhalation exposure only: Crystalline silica (respirable size <=7µm) has been classified by the IARC as Group 1 CARCINOGENIC TO

HUMANS.

NOTE: The physical nature of quartz in the product determines whether it is likely to present a chronic health problem. To be a hazard the material must

enter the breathing zone as respirable particles. .

**Inhalation** Inhalation of dust may cause irritation to the mucous membranes and upper

airways. Symptoms of exposure can include nausea, coughing, sneezing and

breathing difficulties.

**Ingestion** Not a likely source of exposure. May cause irritation to the mouth, oesophagus

and stomach.

Skin May cause drying of the skin resulting in redness and itching.

Eye May cause mechanical irritation in contact with the eyes.

**Chronic Effects** Prolonged or repeated exposure to this material may result in irritation to the

eyes and respiratory tract. As this product may contain traces of respirable silica, bronchitis, silicosis, and lung cancer may occur if the required dust mask is not worn during prolonged and repeated exposure. Studies have shown that

smoking increases the risk in persons exposed to crystalline silica.

# 12. ECOLOGICAL INFORMATION

**Ecotoxicity** No data is available for this material. **Persistence/degradability** No data is available for this material. **Mobility** No data is available for this material.

# MATERIAL SAFETY DATA SHEET

Product Name: ABSORBACIDE

Not classified as a hazardous substance according to criteria of NOHSC

# 13. DISPOSAL CONSIDERATIONS

**Disposal method** Dispose of waste material at an approved municipal landfill or land application

**and containers** site. No special containers are required.

Other information In NSW, diatomaceous earth used as cat litter in a domestic situation can be

disposed of with the normal domestic waste stream ie in the garbage bin. The

NSW EPA does not regulate domestic waste sources.

# 14. TRANSPORT INFORMATION

Not classified as a Dangerous Good, according to the Australian Code

for the Transport of Dangerous Goods by Road and Rail.

ADG UN Number None allocated ADG Proper None allocated Dangerous goods class None allocated

Subsidiary Risk None

Hazchem Code None allocated

# 15. REGULATORY INFORMATION

Poisons schedule Not scheduled
