

IT'S EASY! TURN ANY WALL INTO A VERTICAL WALLGARDEN!

MORE POTTING MIX PER PLANT

BETTER WATER RETENTION

BETTER ROOT BALL GROWTH

GROW HERBS & VEGGIES

Natural Growth

Plants grow vertically as nature intended. Water is saved, each module feeds the next. Wallgarden suits more plant varieties & grow larger for longer.

Grow Herbs & Veggies

Wallgarden provides a healthy environment for a wide variety of edible plants and herbs to grow & prosper.

PERFECT FOR BALCONIES

Modular Design

The patented* Wallgarden design is incredibly versatile. Rearrange modules independently, build your garden as long or as tall as you want, continue to add at any stage.

Simple DIY

Building a vertical garden is easy, with everyday supplies from your hardware store, screwdriver & a drill.

LOW COST per M²

Wallgarden costs less than half the price of similar vertical garden systems.

SIMPLE DIY INSTALLATION

1. Use treated wood (or paint) approx. 20mm thick and from 38 to 66mm wide.
2. Use appropriate fixtures to securely fix wood upright to a load bearing wall or fence.
3. Attach wallgarden to uprights using 8 gauge screws, position using keyholes on each unit.
4. Position modules at least 20mm apart increase for taller plant varieties.
5. Bury root ball in wallgarden module using high nutrient potting mix as you would normally.
6. Move completed module into place.

Technical Specifications:

Dims (mm): **600** wide x **200** deep x **230** high
Coverage: 5 modules @50mm spacing equals 1M²
Manufactured in Australia from stabilised recycled polypropylene.
*Patent application no: 2011902829

VERTICAL GARDEN KIT MODULAR MULTI-HANG

EASILY CLIPS ON TO THESE COMMONLY
AVAILABLE BUILDING MATERIALS

Steel Mesh or RIO concrete reinforcing steel

DIY makes it low cost, you can provide the
backing system from your local hardware store

Holds 4.7 litres of potting mix per plant
Better root growth and water retention

Build your own rail, wood and standard extrusion.
Or screw directly to wall or fence
Clips onto most vertical garden backing systems and Wood lattice

Compare with other systems

- Water Efficient Design
- Water the top row only
Water by hand or fit a low pressure 13mm poly irrigation system to the top row of modules. Water passes through from top to bottom
- Each module is watered and retains moisture after watering, ensuring even irrigation from top to bottom

10 modules covers approx.

.6 square metres

16 modules covers one square metre.

Each module measures:

200 x 200 x H 250 mm

Manufactured from recycled polypropylene with UV inhibitors

10 year warranty and is BPA free. Made in Australia.
