

APPLICATION RATE:

60 - 70 grams per M²

A single application lasts for approximately four months

**Do Not apply any herbicides 8 days prior to, or 8 days
after the application of this product.**

WATER IN THOROUGHLY AFTER APPLICATION. APPLY EVERY 3-4 MONTHS FOR BEST RESULTS

50-70 grams per square metre initially. Depending on the original condition of your lawn a second application at the same rate may be required after 4 months. As the appearance of your lawn improves, you may be able to reduce the application rate by up to 30%. Always remember to water in thoroughly after application to ensure the microbes get activated. The micro granule size of Troforte[®] M Fert-O-Lawn will ensure even spread.

When to apply Troforte[®] M Fert-O-Lawn: To maintain even colour and health of your lawn year round, it is recommended that you apply Troforte[®] M Fert-O-Lawn 3 times a year i.e. every 4 months.

Note: Please do not apply Troforte[®] M in extremely hot conditions. Apply early mornings or late evenings and water in immediately.
