

COOLCHICK - 100 grams

SPECIES

Poultry

INDICATIONS

Aids in maintaining water balance to assist in reducing the effects of heat stress in chickens

FEATURES

- ✓ Comes in a powder form
- ✓ Provides a good source of vitamins
- ✓ Contains betaine to assist in water balance
- ✓ Contains an immediate source of energy
- ✓ 100% water soluble
- ✓ Easy to use
- ✓ Comes with a 5 gram scoop

DIRECTIONS FOR USE

1.5 grams/1 litre of water

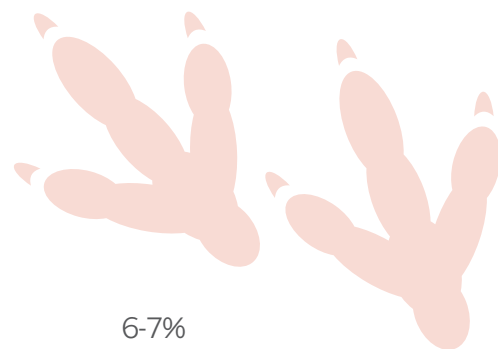

1. Calculate the amount of water that your chicken(s) will drink. A standard sized adult chicken drinks about 200-250ml per day. The inclusion of 1.5g per 1 litre of water will be sufficient for 4 chickens per day under normal conditions
2. Mix 1.5g of CoolChick per litre of clean water
3. Give this mixture as the sole source of water throughout the day
4. For best results and to maintain water balance CoolChick should be given at least 2 hours before the possible onset of heat stress
5. In extremely hot weather, the water consumption might increase
 - Avoid contact with skin and eyes
 - Avoid breathing dust

BENEFITS

- + Assists in water balance and reduces the effects of heat stress
- + Boosts vitamin levels in times of need
- + Increases energy levels
