NATRASOAP

DESCRIPTION

Natrasoap is an organically registered contact pesticide with a unique formulation. Natrasoap is derived from potassium salts, combined with fatty acids in a vegetable oil base. Natrasoap is effective against a wide range of pests that are found in fruit trees, vegetables crops and ornamentals, including Aphids, Mites, Leafhopper, Thrips, Whitefly, Mealy Bug, Scale and Fungus Nats. Natrasoap is a cost effective pesticide with nil residue, and is highly effective as part of an IPM system due to its mode of action.

PRODUCT FEATURES

- Natrasoap is a contact spray insecticide and requires good coverage for high efficacy. Natrasoap used in an I.P.M. program has demonstrated an ideal fit as it has a different mode of action and is softer on predators than many other currently used insecticides.
- Natrasoap is cost effective and has nil residual, making it safe in the environment and enabling immediate re–entry by workers of the target location.
- Natrasoap can be used in Broadacre applications, fruit trees, vegetables, annuals, nut trees, ornamentals, nursery and indoor or hothouse plants.
- Low Odour.
- Low mammalian toxicity.
- Nil Withholding period.

APPLICATION RATES

USE	PEST	PRODUCT	APPLICATION
Cotton	Aphids Thrips Mealy Bug Two Spotted Mite Spider Mite Whitefly	Banded - 3L/Ha Full Cover - 5-7L/Ha	Min 30L water/Ha Air - 30L water/Ha Boom - 80-120L/Ha Add Spraytech Oil @ 1L/Ha or equivalent.
Outdoor Crops: Vegetables, Fruit Trees, Pot		1.5 to 3.0L per 100L of water	Do not apply with any other product. Use the lower rate in integrated control programs and on tender foliage.
Indoor Plants:		15 to 30ml per L of water	Always add Spraytech Oil at a rate of 5ml per 1L of water.

APPLICATION

Spray when insects are noticed. Spray insects directly and repeat as necessary. A complete coverage of the target is necessary. Apply to point of runoff. Apply morning or evening when temperatures are cooler. Re-apply 5 to 7 days later or as required. Use high pressure with a fine droplet. It is important that the spray makes direct contact with pests.
Always add Spraytech Oil @ 1L/Ha in Cotton.
Mixing Instructions: Shake the container before opening. Pre-mix Natrasoap with Spraytech Oil before adding to the water. Clean, soft water is required to achieve effective results. Maintain good agitation while spraying.
Withholding period: Not required when used as directed.

OTHER APPLICATION

Natrasoap is an alkaline product and therefore it should not be used with other products unless a test is carried out to satisfy the user of its compatibility.
Keep out of reach of children. Do not apply when temperatures exceed 35 degrees Celsius.
Agitate spray vat continuously and use good quality water.

SIZES

Natrasoap is available in six sizes:
500ml, 1 Litre, 5 Litre, 20 Litre, 200 Litre, 1000 Litre
