| Stone Fruit                                                                                                                   | Green Peach Aphid, Black Peach Aphid.                                                                                                                                                                                                                                        | 10mL per 3 litres of water | <p>Spray foliage thoroughly when insects are first seen or if insects reappear. Spray underneath the leaves to kill pests which may be hiding out of sight.</p> <p>For Hibiscus Flower Beetle, spray buds and flowers as needed. For Longtailed Mealybug, apply 3 sprays 2 weeks apart. For Psyllids, spray at first sign and then a week later. For Soft Scales, spray in late Spring or when small scales are first seen.</p> <p>Apply 3 sprays, 2 weeks apart. For best results spray in the morning where there is little or no wind and little direct heat from the sun.</p> <p>As a guide, 2 litres of spray mixture should be sufficient to thoroughly spray a fruit tree up to 3m high, or to spray 10 large tomato plants.</p> <p>Measure lawn area before application. Apply Searles Conguard Garden &amp; Lawn Insecticide using a watering can or a hand sprayer and water in thoroughly. DO NOT mow treated lawn for three days.</p> <p>For Curl Grubs, the optimum application time is after an egg hatch which occurs in late Spring and early Summer. The optimum application time is at the peak of adult bug activity or when small (4mm) larvae are found in the thatch or surface soil. This occurs between late spring and early summer.</p> |

| Lawns                                                                                                                         | *also known as African Black Beetle larvae, Argentinean Scarab larvae or Prunose Scarab larvae. Grubs and Billbugs cause extensive damage to lawns by feeding on grass roots and stems. Affected grass turns yellow then brown and dies, and can be lifted up like a carpet. |                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**NOT TO BE USED FOR ANY PURPOSE. OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION. DO NOT PICK STONE FRUIT FOR 21 DAYS AFTER SPRAYING. DO NOT PICK BRASSICAS, CAPSICUM, EGG PLANTS, POTATOES OR SWEET POTATOES FOR 7 DAYS AFTER SPRAYING. DO NOT PICK TOMATOES FOR 3 DAYS AFTER SPRAYING. DO NOT PICK CUCURBITS FOR 1 DAY AFTER SPRAYING.**

#### HOW TO PREPARE:

Shake well before use. Add the required amount of Searles Conguard Garden & Lawn Insecticide to water in a sprayer or watering can and mix thoroughly. The prepared spray must be used on the day it is mixed.

**DO NOT PICK STONE FRUIT FOR 21 DAYS AFTER SPRAYING.**  
**DO NOT PICK BRASSICAS, CAPSICUM, EGG PLANTS, POTATOES OR SWEET POTATOES FOR 7 DAYS AFTER SPRAYING.**  
**DO NOT PICK TOMATOES FOR 3 DAYS AFTER SPRAYING.**  
**DO NOT PICK CUCURBITS FOR 1 DAY AFTER SPRAYING.**

#### CAUTION:

DO NOT allow chemical containers or spray to get into drains, sewers, streams or ponds. DO NOT spray if bees are feeding on flowering plants. Will kill bees. Children and pets may re-enter the treated area after the spray has dried.

#### STORAGE AND DISPOSAL:

Store in the closed, original container in a cool, dry place out of reach of children. DO NOT store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

#### FIRST AID:

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

APVMA Approval No: 64666/200/1209
